Approved	By:	Fee \$
Not Approved	Date:	Permit #

### Required – List, Drawing, Pictures

- ☐ In the table on the back of this page, **list** ALL trees proposed to be removed. For each, specify the:
- Number # used to designate it on the drawing
  - Species of the tree or stand of trees
  - Diameter of the tree, or range of diameters for a stand of trees
  - Height of tree (required for Removal Code G)
  - Reason(s) to Remove the tree or stand of trees, using the Codes on the back of this application
- ☐ In the space provided on the back of this page, or on a site or landscape plan, **draw**:
- All structures and paving on the lot
  - The street and other features, such as a canal
  - Using the number # that corresponds to the list, the location of each protected tree or existing stands of trees proposed to be removed
  - The distance between trees to be removed and a building foundation (required for Removal Code G)
  - Trees or stands of trees that will remain
  - If removing protected pine trees on a developed residential lot, location where replacement trees will be planted
- ☐ Attach **color pictures** clearly identifying each tree proposed to be removed:
- In relation to the property, such as a view from the street or a view that includes the main structure on the property; AND
  - Showing the reason for removal, such as a close-up of termite or other damage

### Method for Marking Trees

Indicate how you will mark:

- If land clearing, trees that will remain
- If protected trees, trees to be removed

Spray paint for this purpose is prohibited.

☐ All-weather tape or similar

☐ Other: \_\_\_\_\_

Trees to be Removed

List individually for protected trees and as stands for others; use additional sheets or provide a detailed survey/site plan for land clearing permitting

Reasons to Remove (Removal Codes)

Necessity to remove trees:

- A. That pose a safety hazard to pedestrian or vehicular traffic or threaten to cause disruption of public services.
- B. Which pose a safety hazard to buildings.
- C. Weakened by disease or insects.
- D. Weakened by age, storm, fire or other injury.
- E. In order to construct proposed improvements as a result of need for access to the building site for construction equipment, essential grade changes, surface water drainage and utility installations, or location of the proposed structure so as to avoid unreasonable economic hardships.
- F. To observe good tree maintenance practices that will strengthen and protect existing trees.
- G. Too close to a building's foundation.
- X. Other (specify):

For protected pine trees, if:

- P1. Its branches overhang any principle structure, accessory building, driveway, or swimming pool.
- P2. Its roots are damaging or threatening to cause damage to the principle structure, sidewalk, driveway, patio, or other immovable structure.
- P3. Its roots are causing damage or threatening to cause damage to sewer or drain lines.
- P4. It is interfering with the proper maintenance of hardwood trees.
